

About EZ-ACCESS

EZ-ACCESS is the world's leading manufacturer of high quality aluminum ramp systems. We are a family-owned and operated company with over 30 years of experience in designing and manufacturing access solutions. Our products are made in the USA and are known for their safety, durability, and workmanship.

In addition to the versatile PATHWAY® Modular Access System, we manufacture the PASSPORT® Vertical Platform Lift and a variety of portable ramps and other mobility accessories for both commercial and residential use.

EZ-ACCESS can make any type of home, regardless of age or style, accessible. Our products provide flexible short- and long-term solutions for a variety of needs.

Through an extensive network of local authorized dealers, EZ-ACCESS serves the entire United States with professional products and quick installation.

PATHWAY® MODULAR ACCESS SYSTEM

Life changes.

Be ready for the unexpected with help from EZ-ACCESS.

EZ-ACCESS®

The PATHWAY® Modular Access System provides the safest, fastest, and most efficient solution to your accessibility needs.

Its unique features make it an excellent choice when your residential access requirements extend beyond the scope of a portable ramp. Durable, dependable, and American made, the PATHWAY offers efficient, customizable solutions. And if your needs change, the PATHWAY System can change with you.

Anytime. Anywhere.

Be ready for life with the PATHWAY® Modular Access System!

Whether you need a short-term access solution or have experienced a recent injury or illness, the PATHWAY provides you with safe accessibility.

Made of welded, high-strength aluminum, our maintenance-free design ensures safe, reliable access, low maintenance, lasting durability, and an attractive appearance. With its unique, hassle-free design, the PATHWAY can easily be installed during any season and withstand any climate.

Consider the PATHWAY's Flexibility

The PATHWAY allows for infinite modular ramp configurations, creating safe and seamless access for both standard and unique entryways.

- Quick installation means minimal disruption for you and your family. A 24-foot system can be installed, including handrails, in less than 30 minutes.
- Safety is our top priority. The PATHWAY will not deteriorate from the outdoor elements and features a slip-resistant surface that maintains traction in any weather.
- The ramp system will not affect your home's property value. Typically, no permits are required, which means little or no long-term impact to your yard or home. The PATHWAY is not altering or adding to the structure of the residence – no poured footers, no construction – just assembly.
- Its self-adjusting bottom transition plate allows for smooth ramp-to-ground transition on most surface types.
- Multi-positional base feet allow the system to be positioned anywhere – including next to foundations.
- Unique handrail connectors join rails securely, creating smooth, continuous handrails.
- Innovative connectors provide a smooth (bump-free) ramp-to-platform transition, eliminating trip hazards.
- Designed to be installed at inclines that maximize ease of use and safety.
- Sides are finished and flush with no hazardous nuts or bolts protruding into the usable ramp area.

The PATHWAY Choice

We are committed to making the process of choosing the best ramp solution as worry-free as possible. With the PATHWAY, you can be confident that your accessibility needs will be resolved safely and quickly.

- The PATHWAY is uniquely designed and built to transition with you. The ramp system can be modified and reconfigured as your needs change.
- If you no longer need your system, the PATHWAY can easily be reused, rented, or resold. In addition, your investment in the PATHWAY System is protected by a three-year limited warranty.

The Aluminum Advantage

The decision on whether to install an aluminum accessibility solution or build a wood ramp can be a difficult one. However, aluminum modular ramps have many advantages over their wooden counterparts.

- Virtually maintenance free.
- Will not rot or rust.
- Easy assembly with minimal tools.
- Environmentally friendly.

Quick Specs

- Ramps feature a standard width of 36 inches, with lengths in 1 foot increments ranging from 2 to 10 feet.
- Custom ramp widths and platform sizes are available.
- Permanent slip-resistant surface.
- No anchoring in concrete footings or pads is required.
- Weight capacity of 850 pounds per ramp/platform section.
